Support me and the development of Taimumari 2 by purchasing this DLC.. Sale for Taimumari, IN-VERT and Legend of Himari : Now sale for all my games! All games bundle. Legend of Himari 2 New battle gif : Legend of Himari 2 is a unique mix of a simulator, RPG, action and clicker. The battle happens in automatic mode: you have to monitor the health of your characters, cast their spells, use items and change the character placement, as the first hero takes most of the damage..

NEXORIA : Legend of Himari 2 change title to NEXORIA. After all, the arcade game turned into a tactical turn-based dungeon-crawler game. The game has become so unlike "Legend of Himari" that I decided to untie this game from any franchise and make it an independent product. But still in the Taimumari universe. Moreover, the game will be released soon, but only in early access. Active participation of Steam player community is necessary for creating a quality game. So, NEXORIA is a hardcore roguelike about dungeons with hybrid battles, combining classical turn based combat system and a collectible card game. Collect the best spells and conquer the dungeons! This game is a unique mix of rogue-like with dungeon exploration, RPG, turn-based tactics and collectible card game. At the base of the turn-based system are not turns, but time. Find and improve new heroes and get coins to buy new spells. But remember, a heroes death will be fatal.
